

能源与环境系统工程专业培养方案(080504)

(Energy and Environment System Engineering 080504)

(2010 版)

一、专业简介 (I、Major Introduction)

能源与环境系统工程是山东大学校级人才培养基地班，是多学科交叉的复合型专业。该专业立足能源，兼顾环境，培养具有能源转换理论和能源与环境系统工程理论，能源转换与有效利用及其环境影响的分析能力，具有系统思维和较强的创新能力，较高的职业道德素质和文化素质的高级复合型人才。

Energy and Environment System Engineering is the base-class major for personnel training of Shandong University. This major is an interdisciplinary major which bases its education on the energy field, also takes the environment into account. It is committed to cultivating advanced engineering talents with inter-disciplinary knowledge in energy conversion, energy and environment system engineering, being capable of analyzing the efficient utilization of energy and the corresponding environmental impacts, possessing ability of systems thinking and innovative consciousness, as well as high level cultural quality and professional moral.

二、培养目标 (II、Academic Objectives)

本专业主要培养具有能源转换与有效利用和能源与环境系统工程理论，掌握能源转换过程原理，掌握能源与环境系统工程环境影响分析评价方法，具有系统思维和较强创新能力，较高道德素质和文化素质的高级复合型人才，以满足社会对通过资源、能源优化利用解决环境问题的人才需求。

This major are for students to master principle of energy conversion and efficient utilization, theory of the energy and environment system engineering; to possess the ability for carrying out environmental impacts analysis and evaluation, integrated thinking and innovative consciousness, high level cultural quality and professional moral; to be capable to meet the requirement of society for people who can solve environmental problems through the optimal utilization of resources and energy.

三、培养要求 (III、Academic Requirement)

本专业学生主要学习能源与环境系统工程的基本理论，学习新能源技术、能量转换与有效利用及环境保护的理论与技术，接受现代工程师的基本训练，具备国际化视野，能够进行能源利用领域环境相关的分析、设计、优化运行、研究创新与生产管理的综合能力。

This major are for students to master the basic theory of the energy and environment system engineering, the technology of new types of energy, the theory and technology of energy conversion, energy effective use as well as environmental protection; to receive the basic training as modern engineer; to possess a international outlook, and the ability to carry out environmentally relevant analysis, design, optimal operation, research and management within the field of energy utilization.

四、学制与学位 (IV、Length of Schooling and Degree)

学制：四年。

按计划要求完成学业者，授予工学学士学位。

Length of Schooling: 4 years

Students who complete all the required courses will be conferred the bachelor's degree.

五、学时与学分(V、Hours/Credits)

总学分: (Total Credits:)158

课程教学学时/学分: 2168/140.5 占总学分的比例: 89 %

(Curriculum Class Hours/Credits: 2168/140.5 Percentage in Total Credits: 89 %)

六、专业主干课程(VI、Main Courses)

主要专业课程包括: 热工流体类、能源与环境类、机械原理与设计类、控制理论、测试技术、能源工业污染物排放与控制、换热器原理与设计、核电厂系统及设备、循环经济与清洁生产、工业生态学、能源与环境管理等。

The main courses includes thermal and fluid courses, energy and the environment courses, mechanical principle and design courses, control theory, testing technology, emission and control of pollutants in energy industry, heat exchanger sign, nuclear power plant systems and equipment, recycle economy and cleaner production, industrial ecology, energy and environment management, etc.

七、主要专业实验和实习安排 (VII、Main Laboratory and Practice)

实验内容主要包括传热学实验、工程热力学实验、流体力学实验、控制理论实验、测试技术实验、分布式能源系统创新设计、清洁生产及循环经济创新设计、太阳能综合利用实验项目、生物质综合利用实验项目、小区域分布式能源实验项目、热力系统创新设计。

实习主要包括工程训练、工程训练(电工)、认识实习、生产实习。

Main experiments include heat transfer experiment, engineering thermodynamics experiment, fluid mechanics experiment, control theory experiment, measurement technology experiment, design of distributed energy system, design on recycle economy and cleaner production, integrated solar energy utilization experiment, integrated bio energy utilization experiment, distributed energy in small area experiment, design of thermal power system.

Main practices include Engineering Training (metallurgical technology), Engineering Training (electrical & electronics), Recognition Practice and Industrial Experience..

八、专业优势及特色(VIII、Major Predominance and characteristics)

能源与环境系统工程是山东大学校级人才培养基地班专业。立足点: “火力发电厂”的系统及其设备; 突破点: 着眼新能源, 特别是“核电”; 关注点: 能源转换及有效利用过程中所涉及到的环境问题。瞄准国际先进理念, 实施精英式培养策略, 培养高级复合型人才。

Energy and Environment System Engineering is the base-class major for personnel training of Shandong University. The major of Energy and Environment System Engineering is based on the studying of Power Plant system and equipments, focusing on environmental problems during energy conversion and utilization, emphasizing new energy, especially nuclear energy. This major is committed to cultivating advanced talents with inter-disciplinary knowledge with international outlook, by carrying out elite education and training.

九、各类课程学时学分比例 (IX、The proportion of credit hours of courses)

| 课程类别 Types of courses | | 学分 Credit | | 学时 Hours | | 占总学分百分比 Percentage | |
|--------------------------|---|--------------|-------|--------------|------|-----------------------|--------|
| 必修课 Required Courses | 通识教育必修课程 Required courses of general education | 124 | 32 | 1993+26 周 | 771 | 77. 5% | 20. 0% |
| | 学科基础平台课程 Basic Platform Courses | | 64. 5 | | 1081 | | 40. 3% |

| | | | | |
|--------------------------|--|------|-----------|-------|
| | 专业基础课程 Profession Basic Courses | 8 | 137 | 5.0% |
| | 实践环节 Social Practice | | | |
| 选修课 Selective Courses | 通识教育核心课程 General Education Core Courses | 19.5 | 160 | 6.3% |
| | 通识教育选修课程 General Education Selective | | 96 | 3.7% |
| | 专业选修课程 Selective Courses | | 342 | 12.5% |
| 毕业要求总合计 Total | | 160 | 2587+28 周 | 100% |

十、教学进程、学时学分总体安排（见下表）(X、Curriculum, hours and credits)

能源与环境系统工程专业课程设置及学时分配表 [总表]

| 类别 性质 | 课程号 Course No. | 课 程 名 称 Course Name | 学 分 数 | 总学时 | 总学时 分配 | | 按 学 期 周 学 时 分 配 | | | | | | | | 备注 Notes | |
